

Sanchit Agarwal

SENIOR CONSULTANT & TECHNICAL LEAD

✉ sanchit.agarwal1331@outlook.com | 📠 sanchit-agarwal1331 | 📍 Hitchin, UK

Technical Lead and Data Engineering Consultant with 9+ years of experience delivering cloud-native data platforms, AI-enabled analytics solutions, and large-scale transformation programmes across consulting and enterprise environments. Proven track record of owning end-to-end delivery of customer-facing data products, from requirements discovery and stakeholder engagement through architecture, implementation, and operational support. Deep expertise in AWS, Snowflake, DBT, streaming data platforms, and federated data architectures, with a strong focus on data quality, platform reliability, and AI-ready data foundations.

Work Experience

CGI Limited

London, UK

SENIOR CONSULTANT & TECHNICAL LEAD (DATA SERVICES)

Jun. 2023 — Current

- Led the data services capability within a 400+ person digital transformation programme for the UK's flagship airline, acting as technical owner for customer-facing data initiatives across cloud migration, federated data platform expansion, and AI-enabled delivery acceleration.
- Partnered with Heads of Department to align data delivery with business objectives, establish quarterly roadmaps, and lead agile delivery ceremonies.
- Translated complex commercial requirements into scalable data products, owning solution design, delivery planning, technical trade-offs, and production rollout.
- Led the architecture, implementation, and governance of approximately 15 data products managing over 700 TB of commercial data using AWS Glue, Snowflake, dbt, and Iceberg tables.
- Architected and engineered an operationally critical streaming pipeline using AWS Flink, Kinesis, and Lambda, serving 100 GB per day with a strict p99 two-minute data freshness SLA.
- Implemented robust data contracts and automated data quality frameworks, and presented solutions for performance testing, pipeline monitoring, and non-functional requirements.
- Drove internal AI adoption through natural text-to-SQL analytics workflows and automated security vulnerability remediation pipelines, reducing engineering effort by 70%.
- Strengthened the data community by organizing show-and-tell and retrospective sessions and leading recruitment interviews.

Synovita Corporate Services

Delhi, India

SENIOR DATA ENGINEER

Mar. 2018 — Aug. 2021

- Collaborated directly with the Managing Director to translate business needs into data capabilities for a greenfield platform, establishing short- and medium-term architectural priorities.
- Engineered and automated enterprise data infrastructure on AWS, including Kinesis, RDS, Redshift, S3, and VPC, using Infrastructure-as-Code with AWS CDK and Docker.
- Architected and deployed an end-to-end customer sentiment analysis model using Python Stanza from prototype through production deployment.
- Designed end-to-end ETL ingestion pipelines from S3 to Redshift using Glue and optimized Spark execution configurations to reduce processing time by 30%.

Q3 Technologies

Delhi, India

SOFTWARE ENGINEER

Jul. 2015 — Jan. 2018

- Designed automated ETL pipelines and data transformation workflows using Pandas and Apache Airflow to feed business intelligence dashboards.
- Led development of an in-house machine learning service predicting lead generation rates for web platforms, managing models through testing and deployment.
- Developed full-stack B2B enterprise applications using .NET, AngularJS, and MS SQL Server, applying MVC, unit testing, and Git version control.

Education

University of Surrey

Guildford, U.K.

MASTER OF SCIENCE IN DATA SCIENCE WITH DISTINCTION

2021 — 2022

- Completed a dissertation on Neuro-Symbolic AI (DeepProbLog) to improve classification accuracy on images

Amity University

Delhi, India

BACHELOR OF TECHNOLOGY IN COMPUTER SCIENCE & ENGINEERING

2011 — 2016

Skills

Data Strategy & Architecture	RBAC, Federated Data Governance, Data Quality Contracts, Data Mesh, Kimball, Data Vault, Oracle SQL, Teradata	Programming & ML/AI	Python, SQL, Java, JavaScript, C#, Generative AI/LLM Integration
Cloud & Platform Infrastructure	AWS Glue, Kinesis, Flink, Lambda, S3, RDS, Redshift, Snowflake, Azure	DevOps, Security & Compliance	Docker, Terraform, Git, CI/CD, Snyk
Data Engineering & ELT	dbt, Apache Iceberg, Delta Tables, Spark, Apache Airflow, ETL/ELT Pipeline Design	Monitoring & Testing	Datadog, AWS CloudWatch, JMeter

Extracurricular Activities

London Data Engineering Meetup

London, UK

GUEST SPEAKER

- Delivered a technical presentation on building scalable, federated data mesh platforms using AWS, Snowflake, dbt, and Apache Iceberg.
- LinkedIn
